THE STONY PLAIN W. I. CELEBRATES ITS 21ST BIRTHDAY.

On Friday Aft. the Stony Plain Women's Institute celebrated its 21st anniversary, at a tea held at the home of Mrs J Malloch. Mesdames Dannhauer, Donaldson, W Davidson, C A Gates, M McKinlay, R M Oatway, I Umbach, and R E Wood were guests of honor, being charter members of the organisation, who are still living in Stony Plain and district. One other charter member Mrs J Strassburger was unable to be present.

An interesting program of contests was conducted by the committee in charge—Mesdames Robertson, Mrs Lory, Malloch, Oatway and Clarke.

Mrs M McKinlay won the prize in the Observation Contest; Mrs Yeats the Musical Letter Contest; and Mrs Laundon the Age Contest.

In a few well-chosen words, Mrs Wood, the present Pres, reviewed the past 21 years of work by Stony Plain W. I., and related the story of the W. I. movement—the largest organisation of women in the world.

Mrs Gates recalled many happy events of days gone by in W. I. meetings and work. In her splendid talk, after which she and Mrs. Willie lighted the 21 candles on the birthday cake, and then cut it. Mrs Yeats sang 2 delightful solos, accompanied at the piano by Mrs Oatway.

Delicious refreshments served by the committee brought a very happy occasion to an end—all wishing Stony Plain W. I. many more years of service to the community.

A Christmas Service.

A Christmas service will be held at St Matthew Schoolhouse, in Stony Plain, on the evening of Sunday next, the 16th. This is the regular Sunday evening for holding Lutheran services in English, with the pastor, Rev H Kuring, in charge. The song service will be under the direction of the leader of St Matthew's choir. The program will include the old-time popular melodies appropriate to the occasion and special anthems. This promises to be something exceptional in the way of Christmas services.

Mr. Hardicoff Not Leaving.

The Sun regrets printing an item in its news columns conveying the impression that Harry Hardicoff, the well-known truck driver, was leaving the district and moving to Edson. Mr Hardicoff had made a motor trip to Edson, and, we understand, had been made a very flattering offer to haul ties up there during the winter. Mr. H. has now decided to stay in this district, where he was one of the pioneer truckers, and where he has a number of customers, who have expressed their satisfaction with the service he gives, and would regret seeing him leave.

Good Work Of Scientists On Behalf Of Our Agriculturists Will Save Millions Of Dollars

The gambling element in farming, the destruction of crops through insects and adverse weather, those natural forces that in the past have broken the hearts and bankrupted millions of individual farmers and caused economic disruptions in nations, will be lessened in the future and eventually largely controlled if the work of the entomologist reaches the extent now forecast.

This picture was drawn in the Dominion-wide conference of entomologists held in Ottawa.

The economic side of the work of the insect men, expressed in the co-operation of the Dominion and provincial governments, was demonstrated in the announcement that \$100,000,000 was saved in Canada last year, in lessened damage to plant life, crops and other products.

Of this amount \$50,000,000 was saved in combatting ravages of grasshoppers on the prairies, although these pests took a terrific toll from the wheat farmers.

The grasshoppers pest was prominently before the conference but it was stressed that this is only one of the many pests taking economic toll in destroying crops. Cut worms, wire worms, and 3,000 other destructive insects were directly before the conference and were named as constituting a distinct menace, with almost incredible destructive power. In Canada over 30,000 insects have been classified by the entomologists.

Following the conference an announcement on the findings on grasshoppers alone will be released by the department of agriculture.

How the weather man and the agriculture experts, entomologists and others, are co-operating with the various governments to take the gamble out of farming, was told the conference, by J. Patterson, Toronto, director of the Dominion meteorological bureau.

How the government breeds parasites and releases them to combat the commercially dangerous insects was described by A. B. Baird, Belleville, Ontario. Insects harmless in themselves are bred in millions, taken to the areas infested and proceed to destroy their natural enemies.

Insect Pest Control

Entomologists Advocate Five-Year War Especially On 'Hoppers

The conference of Dominion entomologists—the government's experts on insects and their control—has been completed, with recommendations for a five-year war on commercially dangerous pests being laid before the experts. It was the first nation-wide conference of the entomologists in the last seven years. The chiefs of the laboratories and crop inspection plants throughout the Dominion were present.

Among the recommendations for the next five years of insect pest control, particular emphasis was laid upon insects attacking field crops, forests, grain and other stored products and household insects.

Relief Supplies From East

Maritimes Send 90 Cars Of Supplies To Dry Areas Of Saskatchewan

Maritimers opening their hearts for drought-stricken districts of Saskatchewan to the extent of 90 cars of food and material.

These 90 cars have arrived from various points in the Maritimes since October 15. W. W. Champ, chairman of the Saskatchewan volunteer rural relief committee, reported at Regina. Ontario has sent 109 cars, Mr. Champ reported.

New Advertising Idea

The mystery of strange voices in the house on Gascon de Gofor street in Zaragoza, Spain, was revealed as an advertisement involving a ventriloquist. Prof. Ricardo Ropy Villanova said the ventriloquist had taken refuge in his house, fearing the menace of an aroused populace. He said the ventriloquist had been hired by a store near the house to boost business.

Signs Of Stone Age

But Archaeologists Say Ireland Not Inhabited In Ice Age

Harvard University archaeologists digging into the soil of old Ireland, have shattered a long-held scientific belief that the country was inhabited during the ice age.

There is plenty of evidence, however, that inhabitants of the emerald isle some 6,000 years ago were typical hatchet-wielders of the stone age.

In connection with stone age excavations in the north, 36 hearths and an abundance of implements were found.

A primitive bronze ax of, roughly, 1,500 B.C., and a number of flint tools were found at Carrowladan, in County Mayo. A bronze axe burial mound was excavated at Foinchuck, in County Clare, where the remains of four skeletons in two coffin-like boxes of limestone slabs were found.

West Canadian Turkeys

One British Buyer Considers Them Best Birds Imported

One splendid effect of the high quality of the large shipments of Canadian turkeys to the British Christmas market during the past two seasons is being shown by the outspoken anticipation of British buyers with reference to Canada's forthcoming offering this Christmas. Formerly there was unquestionably some risk involved in transporting chilled poultry over some 6,000 miles but the trial shipment of 80,000 turkeys in 1937 to the British Isles removed any doubt about the delivery of Canadian poultry in good condition. In the following year, still more turkeys and chickens were shipped with such success that British buyers are still talking about the high quality of Canadian birds and the expert manner in which they were packed.

If further evidence were required that the British market is looking to Canada for supplies of Christmas turkey, the following comments of one of the principal buyers may be quoted from the British Produce Trade Journal: "Regarding sources of supply from which we expect turkeys for the Christmas trade proper, we must not forget Canada, which will, we think, be one of the best supplies of this class of meat during December. The Canadian turkey is in our opinion, one of the best imported birds we have in this country. We are sure that last season the quality was better than ever before, and if they are up to last year's standard there should be no trouble in that direction."

A Costly Oyster Stew

Mrs. Ted Brooks of Modesto, Calif., cooked a \$6,000 oyster stew recently and declares she has permanently lost her desire for cooking oysters, reports the Associated Press. In a can of the seafood that went into the stew was a perfect pearl—but the pearl had been scorched and was declared worthless by the jeweler who examined it. Unstewed it would have been worth \$6,000, he said.

Canada Wins International Wheat Championship Twenty Times In Twenty-four Years

Testing Of Seeds

Simple Home Method Found Reliable And Removes Doubt

Take an old newspaper and cut it into sheets five inches square. Soak these sheets for a few minutes in warm water. Now place five of these sheets one on top of the other on a table or bench. Count out twenty, five or fifty kernels of the seed to be tested and place them in regular order on the last paper sheet. Cover with five more sheets of the soaked paper. Roll up the sheets into a doll and tie with string or secure with rubber bands. Place one or more of these dolls in an ordinary two-quart fruit sifter or jar. Fill sifter with warm water and let dolls soak for four or five hours. Then pour out water and put on the screw top without the rubber ring, screw down loosely. Keep the sifter in a warm place for four or five days. Then take out the paper dolls and read the test.

One advantage of this method is its simplicity, since the sifter can be wrapped up at night and kept warm in a closet. The sifter has a lower temperature at night than in the day time, as for instance when wood is used for fuel. The test is easily and quickly read and the results are easily and conveniently handled and occupy little space. Having used and tested practically all the methods recommended for testing seeds this has been found the simplest and most satisfactory.

Test your seeds, don't guess. You can lose enough sowing one field with seed that will not germinate to pay for the time spent testing in ten years.

"You speak to Anglians?"

"A few! And you?"

"Not many!"

The SNAPSHOT GUILD CHRISTMAS GREETINGS

They started out as ordinary snapshots but, artfully handled, turned out to be charming greeting cards. A simple, effective and individual solution of the greeting card problem.

Snapshoters have a great advantage over ordinary folk at Christmas time, for they can easily produce Christmas cards that are 100 per cent. individual, unusual, and not at all expensive.

What's the purpose of a Christmas card, anyway? Simply to carry a message of good cheer from one person to another. It is, at its best, a very personal affair. Snapshots of yourself, your home, your family, your pets or anything else that's part of your life can be easily used in Christmas cards. The result is cards like no one else's.

There are many ways of using snapshots in greetings. The photo finishers in your town are equipped to make greetings for you, using one of your own snaps. They do so, beautiful things; it will pay you, at least, to investigate them.

Or you may want to be even more individual. One of the simplest greetings consists of a card with a snapshot pasted on it and a handwritten message below. Nothing can be more personal than that!

The opportunities for unusual and beautiful cards are endless. It's a challenge to your ingenuity. But no matter how clever the scheme, the snapshot itself must be good—and appropriate.

You might use a snapshot of your family, stood up in a row, facing the camera. But is there anything

Christmas about that? Not much. It would be far better, wouldn't it, to have a snap of the family group about the fireplace, hanging up their Christmas stockings? Or decorating the tree, or putting up a holly wreath on the front door? A view of your lighted home on a winter night would make a charming card.

Your camera can do just about anything you want, providing just that you give it the right kind of co-operation. For interiors and night views outdoors use a super-sensitive film; equip yourself with a few of the inexpensive modern lamps of the photoflood and photo-flash types; don't forget to use slide headlights can be used to light up small outdoor scenes sufficiently for brief time exposures. And so on.

But remember that now, of all times, your picture must "tell a story," must be clean-cut and vivid. The idea is the most important thing. With care you can get the picture you want.

Go to a "creative session" with your family now. Discuss ideas, select the best—and get out your cameras.

One words of advice, born of experience—simple ideas are best. They are easier to execute and, also, times out of us, they "click" more effectively than something pretentious or complicated.

JOHN VAN GUILDER

Capture of the international wheat championship at Chicago fair by J. S. Allsop, of Wembley, Alberta, is the eighth time the prize has come to Alberta in 11 years and the fifth time to the Wembley district.

Allsop is only 20 years old, and this was his second effort at Chicago. In 1928 he came fifth in hard spring wheat there.

Allsop has his farm near that of the famous Herman Trele, who has produced four world championship wheat samples, but the new champion has always operated entirely independently of the former wheat king.

John Allsop and his father, S. B. Allsop, have been constant exhibitors in seed grains for a number of years, but their chief wins always have been in winter wheat until this year. Trele's Allsop took first in winter wheat, last year at Chicago and the year before at Toronto royal.

The Allsops originally came from England but have been in Alberta for some years, the father having moved to some time near Calgary before moving to the Wembley district, where he bought a half section of land from Herman Trele's brother-in-law. Father and son have been prominent not only in seed grain production, but also as successful mixed farmers, having a good head of cattle and an other stock. Mrs. Allsop, senior, took a lively interest in the seed grain exhibits of her husband and son before her death a year ago.

Great satisfaction was expressed by Alberta agricultural officials when word was received of the winning of the world wheat title for Alberta. Hon. Hugh Allen, minister of lands and mines, who is member for Grande Prairie, and who is a personal friend of long standing of the new champion, gave great praise to "the wheat king" of the Allsops in production of high quality seed grain, and paid tribute to them as all-round good farmers.

"For the past four years I have been my ambition to win the international championship," he said at his home four miles from Wembley, on the brow of a hill overlooking Lake Saskatchewan; a charming farm home, retaining much of the old English atmosphere in which his ancestors lived and farmed for many generations in the Old Country.

"The young winner's father gives Herman Trele much credit for the son's success—for the inspiration to persistent effort, thought not for the grain itself.

"And if I hadn't won this year, I'd have kept right on trying," said the youthful wheat winner. "I've had been good experience for next year."

Allsop's victory gave Canada its 20th win in the 24 times the title has been awarded at Chicago.

Allsop's win brought Alberta's string of victories in the wheat sweepstakes to eight compared with 11 for Saskatchewan and only one for Manitoba. Not since 1928 has the United States been able to produce a champion in the sweepstakes. The 1933 title was won by Frank Isaacson, of Elfron, in northern Saskatchewan.

Seager Wheeler, who is experimenting in fruit growing at his farm at Rosthern, Sask., won the Chicago wheat crown five times—in 1911, 1914, 1915, 1916 and 1918. Trele's four wins were in 1926, 1930, 1931 and 1932.

J. C. Mitchell, of Dalmora, Sask., won the title in 1919, 1920 and 1924. Other Canadian winners were: 1912, Henry Holmes, Alberta; 1913, Paul Gerlach, Saskatchewan; 1917, Samuel Larcombe, Manitoba; 1927, H. O. Wiser, Saskatchewan; 1928, H. G. H. Smith, Alberta; 1929, Joseph H. R. Smith, Alberta.

The four United States victories were scored by G. W. Craft in 1921; L. P. Yates in 1925, and C. Edison Smith in 1927 and 1928.

The strongest man in the world is to appear in London. It is said that when 55 wants to open a railway carriage window, he just does it.

There are 20,000,000 widows in India.

WORLD HAPPENINGS BRIEFLY TOLD

Henry Wise Wood, veteran chairman of the Alberta wheat pool, was re-elected to office at the annual meeting at Calgary. C. Jensen of McGrath, was named vice-president.

Vincent Buckmaster, chairman of the governing body of the Imperial College of Science and Technology and a former lord chancellor, died recently in London.

A special period of training of French reserve soldiers as part of a plan to build up the nation's defences, especially along the Rhine frontier, was announced recently.

Government regulations on the sale of liquor in Newfoundland have been radically changed, according to an official communique. Amount of purchases, hitherto set at three bottles of spirits a week, is now unrestricted.

A rubber exhibition opened at the Science Museum, South Kensington, and running six months, will include two rubber seeds brought from the Amazon by Sir Henry Wickham in 1876.

Bird fanciers who attended the All-England show at Norwich, England, talked of purple and red ears as being possibly shown at next year's exhibition, feeding having been discovered as the secret of color.

The appointment of F. G. T. Lucas, K.C., of Vancouver, to be a judge of the supreme court of British Columbia has been approved by the governor-general. He succeeds Mr. Justice Macdonald, resigned.

A course in marriage, to instruct men students how to avoid unhappy unions is being considered by the University of Washington. Dr. Norman S. Hayner, associate professor of sociology, disclosed. The course would be open to seniors only.

An adverse trade balance of nearly \$100,000,000 for the year ended October 31 was revealed in Irish Free State trade statistics. As in recent years much of the adverse balance is attributed to the dispute with the United Kingdom since the advent of the Republican government to power.

Building Programs

United States Government To Expend Large Amount On Housing Hinting possibly at the vast size to which the United States government may expand its slum clearance and low cost housing. Secretary of Interior Harold Ickes said the public works administration's present \$150,000,000 program "will barely scratch the surface." "We know that in the end a much more liberal contribution will be, or at least ought to be made for this desirable social purpose," Ickes said. He expressed a hope for a greatly enlarged program in 1935.

INFANTS' COLDS

Relieved!

Young children easily catch cold. So Mrs. Russell Ward, of Hilton Beach, Ont., writes: "I notice that there is a great help. I give my baby's Own Tablets and find they are a great help. Thousands of mothers do the same not only for colds but for fretfulness, indigestion, constipation, teething troubles, colic, upset stomach and so on. Baby's Own Tablets are safe and sure in relieving children's common ailments. Price 25c.

Dr. Williams' 150
BABY'S OWN TABLETS

SUNDAY SCHOOL LESSON

DECEMBER 16

THE CHRISTIAN AND THE LORD'S SUPPER

Golden text: "For as often as ye eat this bread, and drink the cup, ye proclaim the Lord's death till he come." 1 Corinthians 11:26.
Lesson: 1 Corinthians 11:23-24.
Devotional reading: Matthew 26:26-28.

Explanations And Comments

Paul's Account of the Instituting of the Lord's Supper, verses 23-25. "For I received of the Lord that which also I delivered unto you" these words Paul prefaces his letter to the Corinthians his account of the instituting of the Supper. By these words he refers to the spiritual meaning of the rite as coming home to him when he ponders the words spoken by Christ to his followers: Paul reports the words to the churches he founded even as these followers of Christ had turned them to him.

"The Lord in the night in which he was betrayed took bread; and when he had given thanks, he brake it." From the Greek word for thanks, eucharistias, comes our word Eucharist. The bread was unleavened and had been especially prepared for the Passover feast which Jesus and his disciples had been eating. It was in the form of hard flat round cakes, which were always broken, never cut. Because Jesus broke off the pieces of bread, the sacrament is sometimes called The Breaking of Bread.

And said, This is my body, which is for you." This represents my body, is meant. The disciples clearly understood the metaphor. "The connection between Christ and us shall be of the closest kind; so close that the words directly to us, he would doubtless have said, 'This cup is not my blood, but my life; drink ye all of it.' His life is the unfailing cup. How shall we drink his life? By no other means, I take it, than we who drink in other spiritual things—by reading, by study, by thought, by imagination." (Douglas Horton).

"This do, as often as ye drink it, in remembrance of me." Taking the cup, Jesus said, "This cup is the new testament in my blood." The metaphor is a somewhat violent one to us, but to the people to whom it was spoken it could have offered no difficulty whatever. Blood was their time-honored synonym for life. Had Christ spoken the words directly to us, he would doubtless have said, "This cup is not my blood, but my life; drink ye all of it." His life is the unfailing cup. How shall we drink his life? By no other means, I take it, than we who drink in other spiritual things—by reading, by study, by thought, by imagination." (Douglas Horton).

Should Take Precautions

From Kansas Comes A Warning About "The Twin Perils To Farm Children"

In a letter just received from Independence, Kansas, Mr. A. Z. Potter says that having been raised on a farm he has first hand knowledge of the sad deaths of a good many children caused by the carelessness of their elders. Every parent should take heed to this warning—offer in a friendly spirit by our correspondence from Kansas. Here it is:

"The twin perils for children living on farms and in small villages are open wells and clatters and loose boards left with nail points sticking out of them.

"Cover all wells and clatters securely and draw all nails from loose boards because a child stepping on them, whether clean or rusty, is in deadly danger from the germs of Tetanus (lockjaw) with which much ground is infected."

Insects destroy almost one-tenth of the world's crops.

SIR HERBERT S. HOLT

Who has resigned as President of the Royal Bank of Canada and becomes chairman of the executive committee.

Retires From Presidency

Of The Royal Bank

Sir Herbert S. Holt Is Succeeded By Morris W. Wilson As President And Managing Director

After 26 years in office, Sir Herbert S. Holt has relinquished the presidency of The Royal Bank of Canada and now becomes Chairman of the Board and Chairman of the Executive Committee. He is succeeded by Morris W. Wilson as President and Managing Director, and Sydney G. Dobson follows Mr. Wilson as General Manager.

These changes were announced at the end of the bank's fiscal year, following a regular meeting of the board. They are changes which constitute not only an important milestone in the 65 years of Royal Bank history, but also a real point of significance. Sir Herbert Holt's retirement from the presidency marks a change within the ranks of the bank of an outstanding Canadian, under whose leadership the Royal Bank has developed from a relatively small organization to its present status as one of the great financial institutions of the world. Furthermore, the appointment of Morris W. Wilson as President marks the first occasion this office has been attained by a man from within the ranks of the bank.

In assuming the newly created position of Chairman of the Board, Sir Herbert Holt will continue in connection with the Royal Bank which began nearly thirty years ago with his election as a director in February, 1905. He was appointed vice-president of the bank two years later, and became its president on November 16, 1908.

Since the development of an active and highly trained personnel. He has always emphasized the importance of providing opportunity for new ability, and the Royal Bank has become notable for the development of young men such as C. B. Tompkins, Inspector General of Banks, a position created by the Federal Government in 1924, and Graham F. Towers, the recently appointed Governor of the new Central Bank.

It is understood that Sir Herbert's retirement from the presidency marks the age of seventy-eight, is due partly to his desire to have more leisure for periods abroad, but principally to his policy of gradually transferring his direct responsibilities to younger shoulders.

Morris W. Wilson, the new President and Managing Director of the Royal Bank, was formerly Vice-President and General Manager. He is fifty-one years old, the age at which Sir Herbert became president. He was born in Lunenburg, Nova Scotia, where he entered the service of the bank. His entire business career has been with the bank, and the thirty-seven years since he began have been marked by a series of promotions through which he has attained to his present position.

In 1909, when he was twenty-six, Mr. Wilson was moved from the Maritime Provinces to Vancouver, where he became manager of the main office two years later. In 1916 he was transferred to head office in Montreal as Chief Inspector. The following year he became Superintendent of Branches, and in 1922 was appointed Senior Assistant General Manager. He was promoted to General Manager of the bank in July 1929, and in 1931 became Vice-President as well.

Each of his predecessors as president has been, like Sir Herbert, a man of a figure of prominence in industry or commerce. He is thus the first professional banker to become president of the bank.

Sydney G. Dobson, who has been Senior Assistant General Manager since 1929, will become General Manager, having had a similar career. Like Mr. Wilson he was born in the Maritime Provinces, Cape Breton, and is fifty-one years old. He started with the bank as a junior clerk in his home town thirty-four years ago, becoming accountant at Winnipeg in 1908. After serving in various other positions, he was ap-

Fewer, Less Severe Colds With Colds-Control Plan

New Aid in Preventing Colds Makes Possible Better Control of Colds in the Home

CLINICS PROVE PLAN

Mothers can now help their families to greater freedom from colds—fewer colds, shorter colds, milder colds—thanks to the development of the new Vicks VapoRub for Better Control of Colds. The Plan has been clinically tested by physicians—and its effectiveness is being proved daily in thousands of homes.

The Plan, perfected by the makers of Vicks VapoRub, is introduced along with the new aid in preventing colds, Vicks VapoRub (for nose and throat). This new Vicks preparation is the ideal companion to VapoRub, the modern method of treating colds. Briefly, the Plan is this:

To Help Prevent Colds

Watch yourself and children after exposure to any condition that you are apt to be followed by a cold, such as—

Contact with others having fresh colds—crowds, stuffy ill-ventilated rooms, public places—sudden changes in temperature—excesses in living, such as over-eating, smoking or drinking—being tired, or resistance.

Then—at the slightest irritation of

the nasal passages, where most colds start—use Vicks VapoRub at once. Just a few drops up each nostril. Repeat every hour or so if needed. Vicks VapoRub stimulates the functions provided by Nature, in the nose, to prevent colds—and to throw off colds in their early stages. Used in time, Vicks VapoRub helps to avoid many colds entirely.

To Help Shorten a Cold

If cold has developed, massage the throat and chest well with Vicks VapoRub. It attacks the cold direct in two ways at once—by stimulation and inhalation. Through the skin, it acts like a poultice or plaster. At the same time, its medicated vapors, released by the heat of the body, are breathed in direct to inflamed air-passages.

During the day—any time, any place—use Vicks VapoRub every few hours as needed to clear clogged nasal passages. This gives you full 24-hour treatment, without the risks of constant internal dosing, which so often upsets digestion—especially of children.

Try Our Guarantee

Your druggist is offering Vicks VapoRub and Vicks VapoRub on a following trial guarantee. Use as directed in Vicks Plan for Better Control of Colds (details in each Vicks package). Unless you are delighted with results, your druggist is authorized to refund your money.

pointed manager of Sydney Branch in 1910 at the age of 27. Five years later he became Assistant Manager in Montreal. In 1915 he was transferred to Vancouver to succeed Mr. Wilson as manager. In 1918 he became Acting Superintendent of Middle West Branches with headquarters at Winnipeg, and in 1919 was promoted to General Inspector at Head Office. He became Assistant General Manager three years later, and has occupied this position for the last twelve years.

Little Journeys In Science

LIQUID AIR

(By Gordon H. Guest, M.A.)

All gases, if cooled and compressed sufficiently, may be changed into liquids, or even into solids. Sulphur dioxide (the gas which is produced when sulphur burns in air) is easily converted into a liquid, but other gases, including hydrogen and oxygen, are very difficult to liquify. The liquefaction of helium by the Dutch scientist Kamerlingh Onnes, in 1908, was regarded as a great scientific achievement.

Liquid air was first obtained about fifty years ago and since then it has been used commercially, the method of producing it having been continually improved. It is made in large quantities by an intricate machine in which the air is compressed and cooled. The point at which the air becomes liquid is called the "critical temperature." Liquid air boils at -190 degree centigrade. When such objects as a rubber ball, an egg, a piece of meat or a flower are placed in the liquid they become nearly as brittle as glass. When a tea kettle filled with liquid air is placed on a block of ice it boils vigorously, for the ice is hot as compared to the liquid air.

Liquid air is used chiefly in the production of nitrogen, oxygen and argon, and is also used as a cooling agent. When mixed with charcoal it forms a powerful blasting explosive since the charcoal burns in it. It was first thought that liquid air would be used widely for refrigeration, for cooling and ventilating rooms, and for the destruction of bacteria, but because it is expensive to produce and difficult to handle, it has not been used extensively for these purposes.

Longest Fence In World

The world's longest fence—40 kilometers, or about 25 miles—is to be erected along the Norwegian-Finnish border to prevent the nomadic Lap's stray flocks of reindeer wandering uncontrolled from one country to the other.

India will spend \$3,731,000 in developing civil aviation.

MAKE YOUR FALSE TEETH HOLD FAST

Eat, talk, sing and shout and never feel embarrassment. Your false teeth stick all day long when you sprinkle on Dr. Werat's Powder—they fit snugly, comfortably—they can't slip. Preserving the world's leading dentists—they know it's the best! Costs but little—any druggist.

SIXTY-SIX ARE EXECUTED BY FIRING SQUAD

Moscow.—Sixty-six persons were executed by firing squad after conviction on charges of "preparing terrorist plots against high Soviet officials."

The executions, after summary trials at Leningrad and Moscow, followed the assassination of Sergei Leonovich Kiroff, one of the highest-placed Soviet officials, by 30-year-old Leonid Vassilievich Nikolaev.

Thirty-seven were executed at Leningrad and 29 at Moscow.

In all, 39 persons were tried at Leningrad and 32 at Moscow. Two were remanded for further inquiry in Leningrad and three remanded in the capital.

The brief, almost laconic official communiqué described the accused as being aliens for the most part who had entered the Soviet Union via Poland, Latvia and Finland.

In conformity with the decree issued just after Kiroff's death, the men were denied the right of appeal and jury hearings.

The supreme court, military division, heard the cases. Executions were carried out almost immediately after sentence was passed.

The sentence included confiscation of all possessions of the condemned men by the state.

The executions coincided with the cremation of Kiroff's body in preparation for the state funeral. The ashes of the revered Communist leader will be borne to famed Red Square by Joseph Stalin, Klement Voroshiloff and other Soviet commissars and Communist chieftains.

The ashes will be placed in the Communist vaults beside those of Lenin, John Reed and other heroes of the Red revolution.

Valera Gains Six Seats

But Still Lacks Clear Majority In Upper House

Dublin.—President Eamon De Valera's Fianna Fail party gained six seats in the Irish Free State senatorial elections, but failed to gain a clear majority in the upper house, which has continued under sway of the opposition since the Republicans came to power in the Free State.

The results made the standing in the new senate as follows: United Ireland party (opposition) 30; Fianna Fail (government) 19; Labor, seven, and Independent, four. In the last chamber the U.I.P. had 38 members, the Fianna Fail 13, others 11.

The senate consists of 60 members, one-third of whom retire every three years. Elections are not on the fall basis, the seats being filled by elections at which electors are the members of both houses voting on a proportional representation basis.

New Serum Discovered

Kills Cancer Cells But Is Only In Experimental Stage

London.—Discovery of a serum which kills cancer cells after they have been removed from the human body, and does no injury to healthy human tissue so removed, was announced by Dr. Thomas Lumden, director of the London cancer research laboratories.

The scientist, emphasizing strongly that the serum "is only in the experimental stage and has not reached the point where it can be tried on human beings, nevertheless said a stage had been reached in which the serum will kill cancer cells removed from the human body without damage to normal cells similarly treated.

Celebrates Birthday

Ottawa.—Hon. Robert Weir, minister of agriculture, celebrated his 52nd birthday, December 6, born at Wingham, Ont., in 1882, he served for several years as public school inspector in Saskatchewan, was first elected to parliament in the general election of 1930, in Melfort constituency, and was appointed to the cabinet the same year.

W. N. U. 2078

E.P. Ranch Wins Award

Herd Of Shorthorn Cattle Captures Seven Prizes At Chicago

Chicago.—A herd of five Scotch Shorthorn cattle entered in the International Livestock Exposition by His Royal Highness the Prince of Wales, won a total of seven awards, it was announced.

W. L. Carlisle, manager of the royal E.P. ranch at High River, Alberta, was presented with the ribbons, which included one first, three seconds, a third and two fifth places. Carlisle admitted that he had hoped to collect more blue ribbons at the international.

The failure of the prince's herd to repeat his success of 1925 when his prize bull was named senior champion might be laid at the feet of Thomas E. Wilson, veteran Chicago packer, whose entries noted the prince's cattle out of first place in two divisions in which the E.P. entries finished second.

The Prince of Wales won the following awards: first prize of second senior yearling bull, second bull calf, and second showing of two bulls, third showing of three bulls, and fifth two-year-old heifer and the fifth senior yearling heifer.

The Canadian entries will be returned to the E.P. ranch after the exposition. Mr. Carlisle announced they will not be sold here as well many of the cattle entered in the show.

The selection of Peter J. Lux of Shelbyville, Ind., as the winner of the Herman Treffe of Wembley, Alfa, who was barred from competition in the wheat class until 1936 because he won the crown three years in succession.

Lux, four times the corn king of the exposition, cannot enter that class again for three years.

Trade Treaty With U.S.

Premier Bennett Says He Is Willing To Negotiate Agreement

Brookville, Ont.—A declaration that he was willing to conclude a trade agreement with the United States on "fair and just" terms was made here by Prime Minister R. B. Bennett.

He asserted with emphasis the government would "take such action as it was competent to take," when it received the report of the commission on price spreads and mass buying.

He stated the "much disputed legislation" conferring upon the government extraordinary powers for peace, order and good government had become "the salvation of the newspaper industry."

And he also insisted that the establishment of a central bank had been left to the Liberals such an institution would never have been created.

The prime minister addressed a large meeting in the theatre at Brookville, Ont., following the annual meeting of the Eastern Ontario Liberal-Conservative Association, at which he was a guest speaker earlier in the day. His speech, brief but forcible, was suggestive of an election utterance. He defended the record of his administration with particular reference to its trade policy, and attacked the Liberals on a number of counts.

Estimate Of Wheat Crop

Place 1934 Wheat Crop At 250,465,800 Bushels

Winnipeg.—Based on actual threshing returns the Northwest Grain Dealers' Association issued a statement estimating the Western Canadian wheat crop for 1934 at 250,465,800 bushels.

Previously the Dominion bureau of statistics had placed the estimate at 263,000,000 bushels, made prior to collection of threshing returns.

Ninety-six per cent. of the country points in Western Canada made reports for the estimate.

Aged Indian Dead

Calgary.—Nearly 100 years old and still wearing the moccasins and neckties placed on her arm and neck when she was a child, Sparrow Woman of the Blood Reserve, is dead, victim of an accident near her Spring Creek home.

SCORES VICTORY

Captain F. A. Ahern, leader of the Irish Free State Army team, who won the military broom jump during competition at the Royal Winter Fair Horse Show. Captain Ahern is shown with "Ireland's Own," a 3-year-old brown gelding, which he rode during the competition.

New Creditors' Act

Now Being Used Throughout Canada States Finance Minister

Ottawa.—Official receivers appointed under the Farmers' Creditors Arrangement Act are now functioning in every county of Canada, it was announced by Minister of Finance E. N. Rhodes. The legislation which has now been effective in the prairie provinces since Sept. 1, in Ontario and Quebec since Oct. 1, and the rest of Canada since Nov. 1, is being utilized by applicants to an appreciable extent.

To date, 900 applications have actually been received at Ottawa, and it is estimated that throughout Canada, more than 3,000 applications have been filed.

Turkish Women Get Franchise

All Women Over 22 Can Vote In Elections

Ankara, Turkey.—The national assembly decided unanimously and unanimously that from now on any Turkish woman more than 20 years old is eligible for election to the chamber of deputies. It also decided all women over 22 can vote in the national elections.

The newly emancipated women will be given an early opportunity to test their franchise.

GRANDSON PAYS TRIBUTE TO GREAT SOLDIER

Here we see four-year-old Master Douglas Scott, grandson of the late Field Marshal Earl Haig, putting a poppy cross on a portion of the field of Remembrance at Westminster, dedicated to his grandfather, on Armistice Day.

Farm Livestock In Canada

More Cattle And Sheep This Year But Fewer Horses

Ottawa.—Canada had fewer horses and more cattle on the farms this year than last, according to a report issued by the Dominion bureau of statistics. There were more sheep and fewer swine.

By provinces, horses show decreases in all except Nova Scotia where a slight increase is shown. Total cattle have declined in all the provinces, with the exception of Saskatchewan, Alberta and British Columbia. Sheep have increased in all the western provinces. Swine have decreased everywhere except in Quebec, where an increase is indicated. Total poultry show increases in Nova Scotia, Saskatchewan, Alberta and British Columbia, and decreases in Prince Edward Island, New Brunswick, Quebec, Ontario and Manitoba.

I.O.D.E. Scholarships

Alberta And Saskatchewan Winners Named For Post Graduate Work Toronto.—The national executive committee of the Imperial Order Daughters of the Empire, announced the winners of the overseas post-graduate scholarships in the I.O.D.E. war memorial. There are nine winners, one in each province, who each receive a scholarship valued at \$1,800.

Among the winners are: Alberta—Beth Caracallen, University of Alberta. Saskatchewan—Neil Barron Hutchison, Regina, University of Saskatchewan.

School Reforms

Ontario Teacher Favors Intelligence Tests Instead Of Examinations

Toronto.—B. A. C. Ketchum, head master of Trinity College schools, proposed a university board to control matriculation examinations in all provinces and to reduce the examinations to four. Mr. Ketchum addressed the annual old boys' reunion dinner of the schools.

He declared he believed the end of examinations was near but the "funeral" a long way off. He declared he favored intelligence tests instead of periodical examinations.

Combat Drouth

Alberta Pool Appoints A Soil Conservation Committee

Calgary.—Constructive action to halt the spread of waste lands from drouth areas is forecast for Alberta wheat pool members with the addition of a new standing committee this year.

Directors at their annual organization meeting here appointed a soil conservation committee, whose members will be Alberta delegates to an interprovincial pool committee on drouth which is understood to be in process of formation.

FRANCE WILL SEND NO TROOPS INTO SAAR AREA

Geneva.—France has said flatly she will send no troops into the Saar basin—and Great Britain promised to help police the territory during the forthcoming plebiscite if Germany is willing.

Thus, with spectacular suddenness, the League of Nations council found an apparent solution of the problem that brought it into extraordinary session, the matter of keeping the peace in the little European " tinder-box " that votes Jan. 13 to rejoin Germany, join France or remain under the league.

If Germany assents—and Geneva waited anxiously to hear from Berlin—an international army will march into the Saar before the plebiscite to assure "fair and free" balloting.

But the French troops, long held ready to move into the Saar, should attempt to seize it by force, will stay at home.

Through Foreign Minister Pierre Laval, France made her astounding renunciation of the right to send troops into the Saar.

"We cannot participate in an international force," Laval said, "because Germany cannot participate."

Anthony Eden, lord privy seal of Great Britain, in an address that set Geneva a-buzz with comment, proposed an international army be dispatched to the basin before the plebiscite.

Nominations Closed

About Four Names Submitted For Directors Of New Bank

Ottawa.—Nominations for the board of directors of the Bank of Canada are closed and the indications are that about 40 names will be submitted for the seven places on the board.

It was disclosed the submitted names were very satisfactory and a strong board could be selected which would effectively represent Canada both from a geographical and industrial standpoint.

Two of the directors would represent the primary industries, two the commercial and manufacturing industries and the remaining three the other occupations.

Want Federal Loan

Alberta Needs Money To Enable Province To Carry On

Ottawa.—Premier R. G. Reid of Alberta, accompanied by Hon. George Readley, his minister of agriculture, presented to Finance Minister E. N. Rhodes a request for a Dominion government loan to the province of a sum considerably in excess of \$1,000,000, to enable that province to satisfactorily settle its immediate monetary requirements.

While no official decision was possible pending a meeting of the cabinet, it was understood the provincial ministers were satisfied their wishes would be met in one form or another.

Aviators Have Narrow Escape

Edmonton.—When their aeroplane, fully loaded with mining supplies, including 500 pounds of dynamite, plunged through the ice at South Cooking lake air harbor and sank in to six feet of water, Pilot William Jewett, Trail, B.C., and Air Engineer Dave Bishop narrowly escaped here.

Farmer Is Robbed

Montreal.—An iron safe belonging to a farmer on Cote De Liesse, based on the outskirts of the city was carried away and \$2,000 in cash and \$70,000 worth of bonds removed from it.

Will Contest Seats

Toronto.—Communists revealed that they had decided to contest every Toronto municipal seat at the forthcoming elections, including that of the mayor.

Pool Official Re-Elected

Calgary.—Henry Wise Wood, veteran chairman of the Alberta wheat pool, was re-elected to office at the annual meeting here. O. Jensen of McGrath, was named vice-president.

Legal and Municipal Notices, etc., 15c line first insertion; 10c line each subsequent insertion.

The Beaveridge Players.

The Beaveridge Players, who gave a pleasing performance here a short time ago, paid us a return visit Monday, this time appearing in that good production "The Amazon," one of the most thrilling plays shown here. Marion Daine was heard in a popular number "Why don't you practise what you preach." In addition to the play, Jack Laless was heard in a bunch of new jokes and his favorite song "Let the rest of the world go by."

The Beaveridge Players will be here again, early in January, when they present "Soft Soap."

Rally Day Service.

The Rally Day service was a great success, thru the co-operation of the teachers and each class of the Sunday school. Rev W E Sieber gave a fine address on "One Hundred and fifty years of the Sunday School Movement." The girls gave their instructive Pageant "Sunday School visitors from far places" in an efficient manner. Those taking part were—

June Tisdall—British Isles
Mary Campbell—Australia
Gwen Dale—South America
Annie Wadd—Europe
Maryann Entwistle—Palestine
Margaret Fife—India
Olivia Kowesky—China
Elsie Cooper—Japan
Jean Robertson—Korea
Violet Stiles—Africa

The ushers were Leonard Stiles and Geo. Michael. The two seniors taking up collection: Walter Larson and Dan Dale. The singing was good, and the organist thruout the service was Miss S. Everitt. The lumber for extra seating is always kindly loaned by Mr Armbruster.

Open Seasons for Game.

Deer, moose, Nov. 1 to Dec. 14
Ducks, geese, Sept. 15 to Nov. 14
Tik, Oct. 1—Dec. 14
Grouse, Oct. 1—31
Hungarian Partridge, Sept 15—Nov 30
Fox, Nov. 1—Jan. 31
Mink, martin, otter, Nov. 1—March 31
Muskrat, March 1—April 30

Hardwick's for Christmas Gifts.

THE NEWS OF STONY PLAIN AND DISTRICT.

The Jac Enders hudding party got luck to town Saturday with their quota—Pat Gannon and Bert Leeder arrived back Sunday with the trailer loaded.

The big game season closes tomorrow, the 14th.

The Curlers' dance Friday night was a very enjoyable affair. All who attended report having had a good time.

Mr Petters, Sir Malcolm Campbell's speed rival, visited Stony over the week-end and kept buzzing "around town in his Universal Noisemaker."

At the Council meeting on Thursday several 1-man delegations were present, to see the Councillors on business; among these being Mr H B Bjork, who protested against the law regarding the sale of meat in town by hawkers being openly violated.

At the annual meeting of the Ladies Aid of the United Church Mrs J F Clarke was elected Pres.; Mrs George J Bryan, secretary; Mrs R A Walton, Treas.

Holiday decorations have already made their appearance on Main St.—the Barth & Anderson Garage has a nice string of colored lights across the front of the building.

Another sign of the holiday season of the coming Yuletide season is the Christmas big tree in Hardwick's window.

Mr H Brox, a motorist from the Grove, was in Stony on Saturday, and gave a demonstration of the newest invention on his truck, consisting of an attachment on the engine's medulla oblongata, and enables his truck to "glide down hill without using gasoline. Call again, Harry, when we have more time! You're always welcome!

Mr Phillips, of the Calgary Power Co., was in Stony yesterday, installing new meters for 1929 users.

BUTTER AND EGGS WANTED at The Royal Cafe.

Brightbank News.

Hansen, Corner Community hall was filled to the roof, to hear the most eloquent speech, delivered by Donald MacLeod, M. L. A., who outlined the principles and platform of the CCF; his remarks being applauded.

The UFWA concert and dance was a great success.

Our local hunters have returned from the Jungles with moose and deer galore.

Hansen Corner school concert will be held in the Community Hall Wednesday, Dec. 19. All are welcome.

UFA Whist Drive and Dance, Friday, Dec. 14.

Shooting Oulton's Geese.

Police officers have been making an investigation into the complaint of Mr Chas. Oulton, who operates a fur farm 6 miles west of Stony, that 2 hunters entered upon his premises in his absence and shot a number of his geese. In addition to those, 2 others were shot—a pair of Canada wild geese from P.E.I., given him by his father which are over 50 years old. This pair has been hatching eggs for over 40 years now, and are the oldest to hatch eggs in Canada.

THE TENDERFOOT

By

GEORGE B. RODNEY

Author of "The Coronado Trail",
"The Canyon Trail", Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been awfully looking the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go see what was happening for himself—not as Gerald Keene, half owner of the Hour-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward west outfit.

Dad Kane, desert rat and luckless prospector till now is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

Spike Goddard and Sam Dustin, fearing the old prospector may tell others the things he has seen as to the branding of Carr's cattle, plot to get him to show them the location of the mine and then to kill him. Gerald Keene, dressed in ridiculous cowboy costume, arrived at the Hour-glass ranch and is hired as a cowboy by Joe Carr. The impersonation of a tenderfoot is successful, and he is accepted as such by the other occupants of the bunkhouse.

Proof of Dustin's cattle stealing activities was accidentally discovered by Stone, who accompanied by Edith Carr was riding toward the Hour-glass ranch house.

Dustin unexpectedly comes along and seeing them, stops and talks to Edith. He mentions the Soda Springs dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water.

(Now On With The Story)

CHAPTER VI.—Continued

"If he learned that from a catalogue then I'm a Greaser," he muttered and he laid in wait for Stone when supper was done.

"What's the game?" he asked curiously. There was a grin, too, that kept the words from stinging.

Now Red Thom had almost been born in a saddle. He'd raised and cattle from El Gran Chaco to the Barren Ground and he was not to be put off.

"I seen you fall," he said grimly. "A green man can't fall like that. It takes practice. A new man falls stiff. You relax your muscles and that's why you didn't break every bone in your body. Come clean, son. I'll not give you away less'n I have to. Where're you from?"

That is a dangerous question to ask at times but Stone did not resent it.

"I got to spread my own rope my own way," he said, and the homely idiom made Red Thom open his eyes. "You don't mind a man attendin' to his own business, do you?"

"Huh. I reckon not. But you see a few of us has spread a big net here on the Hour-glass. You claim to be a new man. All right. Let it go at that. Get me . . ."

Thom's eyes bored into Stone's inner consciousness and both men grinned at each other in friendly fashion. In that moment a lasting friendship was born. The bunk-house never noticed that Red Thom watched Stone carefully from that day. They were intent on their own deductions.

"He's got that Isabella horse so he'll stand," Spook, Derwent. "The man's got patience and that's all our case. He says he ain't breakin' him; he's a trainin' him. Learned it outen a book, he says. Give him two years under a man and he'll make a good hand."

"If Sam Dustin don't kill him first, I said some one."

"He won't." There was pro-

PURTY FLOUR

BEST FOR ALL YOUR BAKING

phery in Red Thom's voice. "Where is he now?"

"Crews sent him out to ride the West fence up in the Red Water canon to-day. 'Old him to take his pack an' stay there till he got the place fixed. Damn nasty job for one man, if you ask me."

He was right at that. Stone studied his big horse at dawn and headed west across the foot-hills for the more distant ranges, where the land ran out in craggy little peaks and jutting hill-shoulders. He worked his way up, beyond where the mesquite runs out in curly bunch grass, where the red-stemmed madroña gives place to stunted juniper and the red-and-black malpais ledges make horse and man look to their footing.

That fence was a deceptive thing. It wandered for miles along a steep hillside; it stepped drunkenly across deep canyons and arroyos; it twisted among stunted rock-oaks and it dipped into forgotten valleys where aspens yellowed for want of water. He finally came to the top of a rise and studied the land below him.

Red Thom alone at the Hour-glass might not have been surprised at the metamorphosis of the new hand of the Hour-glass. Gone was the slackness of a tired rider. His slim figure settled into his saddle as though molten and poured there. His right hand on the bit told that Isabella horse, for months rejected by the rough-handed riders at the Hour-glass, had "come to hand" till now he responded to the lightest touch of that one hand that he knew. A certain indecible light in the rider's eyes told, too, that under that devil-may-care exterior lay a stratum of danger that had better be left alone.

He loafed in his saddle and scrutinized the flat land below him. The little plain was dotted with mesquite and palo alto, and unsightly cholla and "nigger-head" cactus and the green paddles of the prickly pear showed in great bloated blotches against the yellow of the dry grass. A few stunted live-oaks pricked out an irregular pattern.

"I ought to be fairly alive with cattle . . ." His voice seemed to shout in the universal stillness that was broken only by the wind across the grass and the occasional slide of caving earth down the wall of some dried arroyo. "It sure looks queer to me. This Hour-glass ranch has got a 'nigger-head' cactus and a green paddles of the prickly pear showed in great bloated blotches against the yellow of the dry grass. A few stunted live-oaks pricked out an irregular pattern."

"Every damned thing but cattle, it looks to me as if this talk of Carr just havin' hard luck is all bosh. Even a man's broken leg doesn't keep his cows from calvin'."

"I'd give somethin' pretty to know what's happenin'. Of course it's Broken Spur . . . But . . . to prove it is different."

He studied the distant landscape with somber eyes, but his brain was busy with other matters. Cattle? Where were the cattle that ought to be dotting that broad plain?

"It looks to me as though the old man left a net loss to his heirs. Anybody who would holler with joy over a bequest like the Hour-glass as it stands to-day would sure chuck for a china egg . . . Wait a bit! Let's work this out by simple Rule o' Three. If old man Carr had ample cattle and didn't sell 'em or trade 'em, and if they didn't lay down and die on him, then it's a moral certainty that somebody else either has got or is gettin' 'em. . . He re-

membered that coy, down by Soda Springs.

"Looks funny Edith didn't tell her father about that cow. Old Carr must be scared of Dustin at the Broken Spur. That looks 'bad. Well! If I'm goin' to sit in the game I've got to draw cards. And I've got to sit in the game for my own sake. . . (Even to believe he did not yet admit that Edith was a governing cause in the game). "It looks to me like somebody's got to call this man Dustin an' see what he holds."

He swung out of saddle and let his trail. The horse, on his honor by those trailing reins, passed once or twice at an ant hill and stood with drooping head while Stone settled himself for a study of "the valley."

Miles away he could see the line of trees to the east that marked the land where the Hour-glass men were working in a vain hope to find enough cattle to be worth while. Soda Springs was the hub of the wheel of life on the Hour-glass and Soda Springs was in debate.

"Dustin can't be makin' the cattle till his changes the brand," he muttered as he did it. It is force . . . Dustin ain't shippin' no cattle, and then drive 'em back. It'd cost him too much to square the inspectors at the border. . . He may be shippin' small bunches into California or just drivin' out of the County, ventin' the brands and takin' a chance on sellin' the best way he can. It's a cluck, though; he must be doin' a department store trade."

He fell into deep thought. "Why? Why would a man do this? Not for mere money. There wasn't enough money in a few cattle to make a man risk years in jail."

"Dustin was in it . . . and Spook knew he was . . . then he had some other motive. Edith? There was the answer, and Stone felt such a surge of wrath sweep over him at the thought that he felt hot all over. He suddenly visioned Edith, red-lipped, red-headed, gray-eyed, and he knew that any man would take a chance for her. But . . . how could any chance overpower that hatred that he had read in her eyes for Dustin? In these days men could not compel women to marry them. . . Hold on! . . . Joe Carr was old. He was more or less inept, the result of age and drink, and his daughter loved him dearly. Could this be a scheme on the part of Dustin to win by craft what he could never get otherwise?"

"I believe I've struck it. He shook himself into life. His big horse, pawing at the ant hill, whinnied as a dozen biting ants ran up his leg and bit like fire. Then he raised his great head. Stone's eyes followed the horse's features and suddenly stood like a man petrified!

Far below him, six hundred yards away among the brush, he saw a half-grown calf dodging among the mesquite clumps and behind him rode, with yells and shouting, two men on horses that had been hard-riden.

"By God! That's pretty bare-faced. They're so sure all the Hour-glass men are on the east side of the range that they aren't even stickin' to the high brush. Anybody is

Christmas—New Year's—the great holiday season now drawing close would not be complete without mince pie. Brought to the table, steaming hot, with the delicious filling in a crisp, flaky pastry, mince pie is a table delight looked forward to by every family. And when it's made with PURITY FLOUR you don't need to worry about your pastry. As with cakes, bread, rolls or biscuits, you know that any PURITY FLOUR baking ranks high in flavor, texture and color. Every bag of it is guaranteed to be of the same high quality. Only the finest hard wheat, personally selected in Western Canada, by our representatives goes into the milling of it. Buy a bag of PURITY FLOUR, or your grocer's. You'll find that only one brand, and that PURITY, is all you need to keep on hand for all kinds of baking.

Don't lose FAVORITE RECIPES

At last illustration of recipe No. 393 in the new PURITY COOK-BOOK, sent to you postpaid for 50 cents. In addition to the cook book PURITY FLOUR now offers a convenient recipe file. In attractive cover, well illustrated and featuring PURITY FLOUR recipes, it contains 8 envelopes for filing favorite recipes received from friends or clipped from newspapers. Send to you postpaid for 25 cents, or with the cook book for 60 cents. Send today for your copies to Dept. 6245, Western Canada Flour Mills Co. Ltd., Toronto, Winnipeg, or Calgary.

Little Helps For This Week

"Whom having not seen ye love, in whom though now ye see Him not, ye rejoice with joy unspeakable and full of glory." 1 Peter 1:8.

"If ye love me keep my commandments." John 14:15.

Blest be Thy love dear Lord, That taught me this sweet way, Only to love Thee for Thyself, And for that love obey.

To love God is to love His character. God is Purity, and to be pure in thought and look, to turn away from unwholesome books and conversation, to shun the moments in which we have not been pure, is to love God. God is Love, and to love men until it has expanded into a philanthropy which embraces all, even enemies with compassion, that is to love God. God is Truth, and to be true, to hate every form of falsehood, to live a brave, true, real life, that is to love God. God is Infinite, and to love the boundless, reaching on from grace to grace, adding faith to faith, aiming insatiably to be perfect, even as the Father is perfect, that is to love God.—F. W. Robertson.

Clock Will Speak Time

Experiments Being Made in England With New Gadget

A clock that talks! Not the cuckoo variety, but a clock which will "speak" the time.

This promises to be the latest timepiece in the office. The British post office research station are experimenting with an apparatus which will put "pip" into clocks.

By dialing a special number the office clock will "speak" the time.

Then will follow "pips" at 10 seconds intervals, except at 50 seconds past each minute, when there will be the announcement, for example, "On the third 'pip' it will be exactly 7:46."

The last of three high-pitched signals will indicate then the exact minute.

The ENERGY VALUE of Cod Liver Oil

PLUS SPEEDY ASSIMILATION

With emulsified oils digestion begins at once in the stomach. Ordinary oils must first combine with the pancreatic juices—to form an emulsion—before they can be assimilated.

Scott's Emulsion is mixed quickly and easily assimilated than plain Cod Liver Oil because it is already emulsified. Scott's Emulsion is rich in body building hypophosphates of lime and soda—PLUS values you get in Scott's Emulsion of Cod Liver Oil.

SERVICE GARAGE. Stony Plain.

Apples, Crabapples, Plums and Pears.

In Good Condition: Reasonably Priced. At the L. Zilliox Warehouse, First Street, Stony Plain.

THE WHEAT SURPLUS

The world's "carry-over" of wheat since 1928 has been about 1,100 million bushels each year instead of a normal of 625 million. Authorities estimate that by August 1st next the "carry-over" will be reduced to a figure between 725 and 825 million, or still show over 100 million bushels more than normal. A great shortage of coarse grains, however, is apparent throughout the world. Some expect that a substantial part of the world's wheat "carry-over" will be used to replace coarse grains. If this should occur, no doubt, wheat prices will tend to rise—otherwise they may not do so due to low purchasing power of European bread-eating people.

HOLD CONVENTION • UFA CO-OPERATIVES OF THE PROVINCE.

The fourth annual conference of the UFA Co-operative association in Alberta was opened Tuesday at the Parliament Buildings, Edmonton. In the absence of the President of the UFA, Norman F. Priestly, the Vice-President, was in the chair. Approximately 30 representatives of various Co-ops. thruout Alberta are in attendance. The opening session was devoted to business pertaining to the welfare and operation of the Co-ops.

Steady Progress.

During the last year or more no publication has shown more remarkable strides in the matter of increased circulation than has The Family Herald and Weekly Star. This is not strange, for it is evident that in time of stress people are prone to cut down on the number and variety of magazines and papers coming into their homes, and they find in The Family Herald and Weekly Star a paper which, at \$1 per year, gives them every variety of reading, for old and young, all combined in this one publication. Every issue overflows with practical farming ideas, up-to-the-minute articles, short stories, together with a weekly newspaper section which rounds out a feast of reading without compare. Truly it has been well said that The Family Herald and Weekly Star is the best for the least.

Heard At The Court.

"You are accused" said the magistrate, "of hitting this Chinaman on the head with a vase. What have you to say?" "Well sir," replied the accused, "he was threatening me in broken English, so I replied in broken china."

JUNIOR HOCKEY CLUB MAKE PRESENTATION TO COACH S. GRANT.

This Popular Trainer and Manager Honored by the Junior Stick-Handlers.

At the regular meeting of the Junior Hockey team, a very pleasing incident occurred when a presentation was made to Coach Grant of a handsome silk and wool sweater of the same color as the players' suits and with the label "Coach" emblazoned across the chest. The Boys have been very fortunate in securing funds thru donations and various other methods of securing money for the team, and as there was a nice amount in reserve, it was thought advisable to make the Coach the present, in appreciation of the splendid work he has accomplished in bringing the team up to its present standard of efficiency.

Sunday's Game.

The Junior hockey team had their first game Sunday, when they crossed sticks with the Royal Canadians of Edmonton. As it afterwards turned out, the players were fortunate in that, for an umpire, the services of an expert boxer and wrestler had been secured, in the person of Mr. Henry Trapp. Herr Heinrich had four busy quarter hours. Louie Miller scored early in the game, and from then until the last period Stony lead 1-0. When the onlookers got the idea the game was about over, an R.C. man popped the pellet past Goalie Walter into the net, tying the score—one all. No overtime was played.

With the Seniors.

Our Senior hockey team had been billed for a game at Concordia College Saturday and left here all O.K. The last car, carrying a few players and some equipment, broke down at the Grove, and the game cancelled.

The game Seniors were to have played Sunday at Onoway was cancelled when Mr. Bennet phoned at 10 a.m. that the ice was soft.

The Seniors play Onoway tonight, at our rink.

My Wife's Family Tonight.

The attraction for this Thursday night at Kelly's Hall, "My Wife's Family" is said to be uproariously funny, with many ludicrous situations. It would need to be seen, to be appreciated.

The film shown Thursday, The Solitaire Man, an English production, was particularly good, with scenes in various parts of Europe, and with a lot of action in a plane high up in the air. The McHugh film, the inevitable newspaper skit, this one being called "Extra!" showed the peculiar antics of a stewed prune among the spooks, and caused gales of laughter.

Christmas Eve Services.

Rev R.V. Britton, editor of the Western Catholic, will offer Holy Mass at St. Joseph's Church, at Spruce Grove, at Midnight Christmas.

Holy Mass will also be said at St. Philip's Church, Stony Plain, at the hour of midnight. Rev. C. Keenan.

GEORGE BEVINGTON C. C. F. CANDIDATE IN JASPER-EDSON.

Geo. Bevington, an advocate of monetary reform, will contest the new Jasper-Edson Federal Riding under the auspices of the C.C.F. party. George was chosen at a convention held in Edmonton on the 5th, and which was presided over by Hugh Critchlow, president of the UFA and UFWA political organizations in the constituency. About 50 delegates from UFA and UFWA Locals were present.

Donald MacLeod, Assemblyman for Stony Plain, and H. Critchlow, Barhead, were also in the running. A resolution passed at a previous meeting to the effect that representatives of the press attend only on invitation, was reaffirmed and an invitation was not given.

The delegation from nearby Locals included W.T. Propp and Don McDonald.

Bevington is on the UFA Executive; Vice-Pres. of the UFA Federal Constituency Committee. He appeared before the Commission on Money Reform held in Ottawa in 1923; has appeared before Alberta Legislature on Monetary questions and is a strong advocate of Social Credit.

Calendar.

On the Side.

Citizens of Outremont, a suburb of Montreal, are to be assured a peaceful night's sleep. A bylaw has been passed providing a \$40 fine for anyone who rattles a milk can, or toots a horn after 11 p.m.

An Ontario lawyer in giving an address before a club of his colleagues on present day investing, remarked that there are three classes of suckers—ministers, doctors and lawyers. Perhaps he meant that no other class has any money to invest.

The Supreme Court of Canada is to decide whether or not an Eskimo is an Indian. Some of our friends could be identified as Indians without reference to such an exalted body, says the Hamilton Herald.
